Baseline reports can

- Highlight issues (country and regional levels)
- Provide baseline for monitoring
- Used as a fundraising tool
- Fulfill the commitments made at the Ministerial Conference in 2014

www.getinthepicture.org

- Country profiles, progress and reports
- Partners resources and activities
- Regional Dashboard (coming soon!)
Inputs to reporting

- Multiple ministries and agencies will most likely need to be involved.
- Possibly through national CRVS coordination mechanism.
- Alternatively through specific meetings or electronically.
Key elements of the report

- Baseline data for targets (quantitative data and process)
- National target values (can be step by step)
- Implementation steps completed or in progress
- Supporting documentation (including assessments, strategies)
Assistance with reporting

- Assistance from partners
- Further tools and resources on getinthepicture.org/reporting
- ESCAP can always be contacted with questions or need for support
Key documents

Guidelines for setting and monitoring the goals and targets of the Regional Action Framework on CRVS developed:

CRVS Decade brochure containing the Ministerial Declaration and Regional Action Framework:

Brochure on CRVS in Asia and the Pacific:

Questions and answers on reporting:
Exercise

2. Download “CRVS RAF_regional baseline report synthesis” (available in word and pdf)

3. Review your countries baseline data and targets on Goal 3 ONLY (targets on next page)

4. Answer questions:
   a. If you do not have targets, can you propose them?
   b. Is the progress so far on schedule? Early? Late?
   c. What can you do ensure that the targets are met?
   d. What can we (partners) do to help you?
Exercise

Goal 3: Accurate, complete and timely vital statistics (including on causes of death) are produced based on registration records and are disseminated

3.A. By … (year), annual nationally representative statistics on births – disaggregated by age of mother, sex of child, geographic area and administrative subdivision – are produced from registration records or other valid administrative data sources.

3.B. By … (year), annual nationally representative statistics on deaths – disaggregated by age, sex, cause of death defined by ICD (latest version as appropriate), geographic area and administrative subdivision – are produced from registration records or other valid administrative data sources.

3.C. By 2024, at least … per cent of deaths occurring in health facilities or with the attention of a medical practitioner have an underlying cause of death code derived from the medical certificate according to the standards defined by ICD (latest version as appropriate).

3.D. By 2024, the proportion of deaths coded to ill-defined codes will have been reduced by … per cent compared with the baseline year.[1]

3.E. By 2024, at least … per cent of deaths taking place outside of a health facility and without the attention of a medical practitioner have their underlying cause of death code determined through verbal autopsy in line with international standards.

3.F. By … (year), key summary tabulations of vital statistics on births and deaths using registration records as the primary source, are made available in the public domain in electronic format annually, and within one calendar year.

3.G. By … (year), key summary tabulations of vital statistics on causes of death using registration records as the primary source, are made available in the public domain in electronic format annually, and within two calendar years.

3.H. By … (year), an accurate, complete and timely vital statistics report for the previous two years, using registration records as the primary source, is made available in the public domain.
Thank you!
